

Biofeedback

Applications and past decade advances

Masoud Nosratabadi
PhD in Health Psychology

What is Biofeedback

- We have a puzzle for understanding Biofeedback mechanism
 - A) Feedback
 - B) Learning psychology

- In general theory of systems, each system has at least two parts which communicate with each other
- We have a loop of feed forward and feedback in each systems.

- Our brain works based on feed forward and feedback loops too.
- The result of this loop is **Self Regulation**.

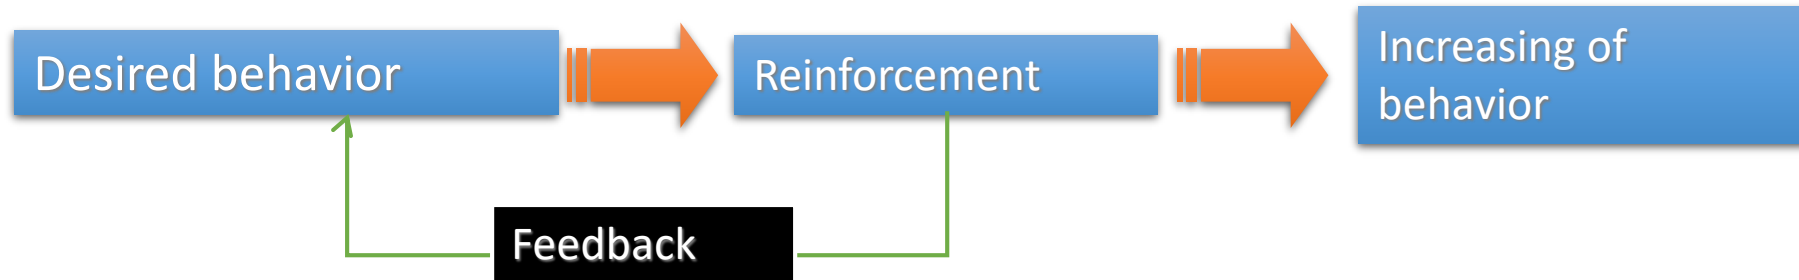

Learning Psychology

- One of main subjects in learning psychology is conditioning.
- We have two type of conditioning: Classic conditioning & Operant Conditioning.
- Neurofeedback generally works based on Operant conditioning.

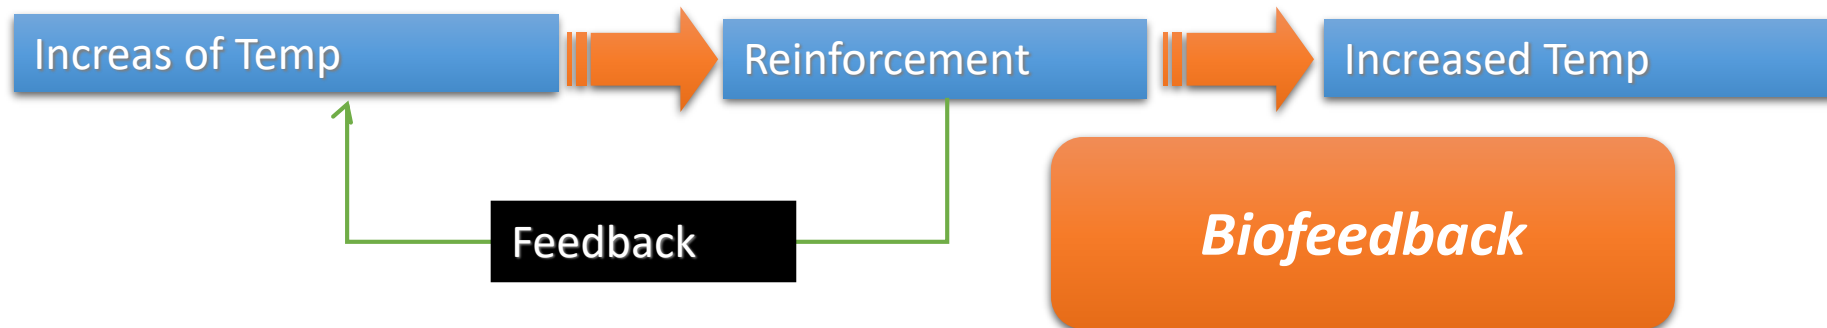

Learning Psychology

- Learning of a behavior

- Learning of a change in biological responses

Types of Biofeedback

- Temperature Biofeedback
- EMG Biofeedback
- Heart Rate biofeedback
- Heart rate variability (HRV) Biofeedback
- Respiration Biofeedback
- GSR/SC/EDA Biofeedback
- EEG Biofeedback (Neurofeedback)

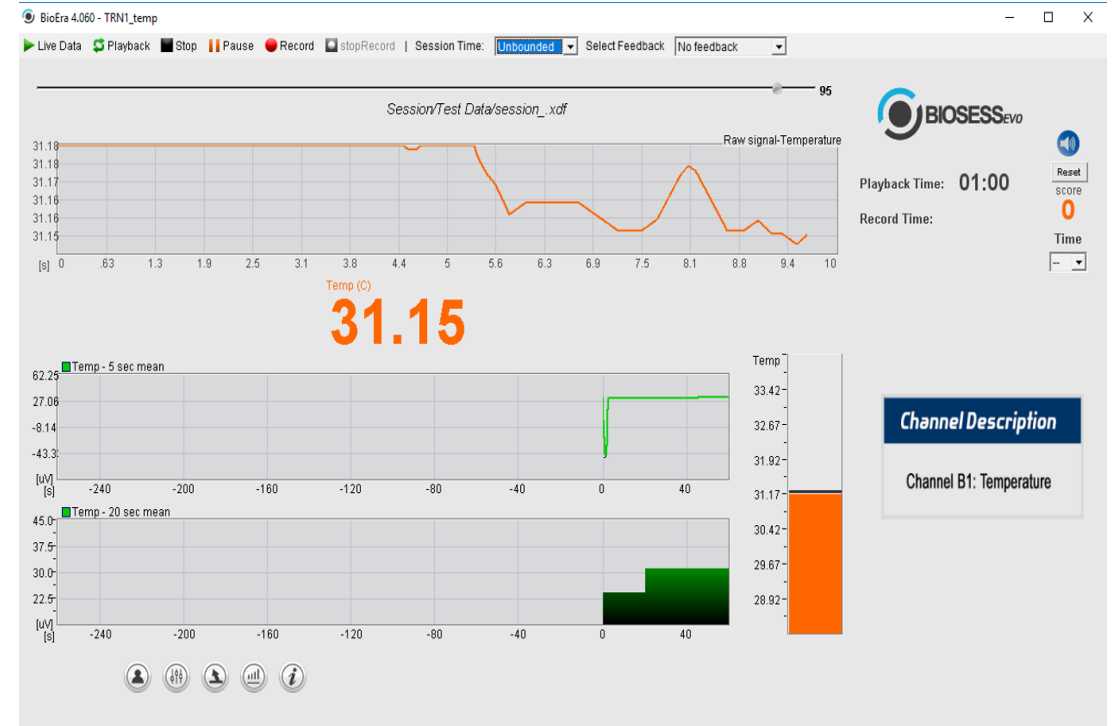

Research Papers (PubMed)

Clinical Applications

Temperature Biofeedback

- Migraine Headache
- Reynaud Syndrome

Skin Conductance Biofeedback

- Anxiety
- Arousal modification

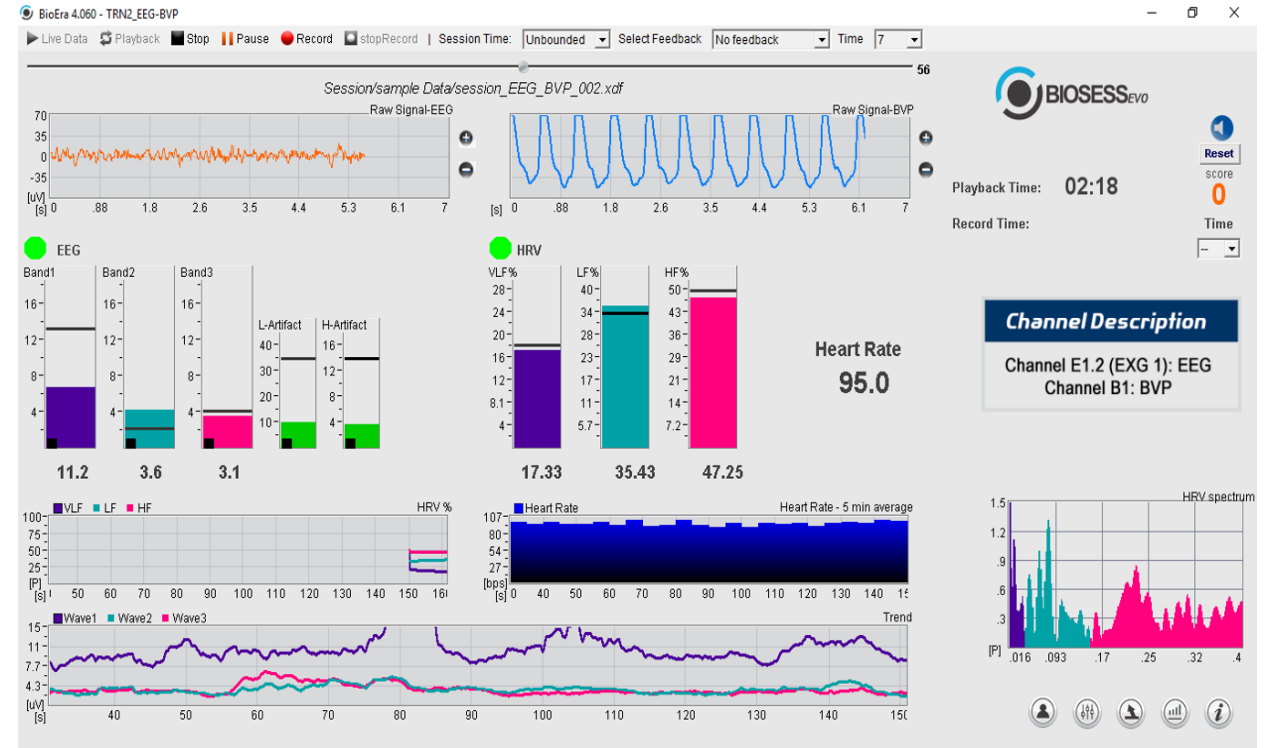

Electromyography (EMG) Biofeedback

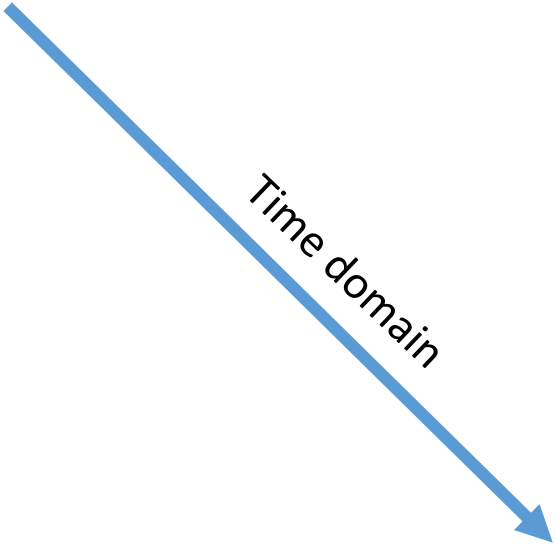

- Muscle Pattern Training
- Stroke Rehabilitation
- Pelvic Floor

Heart Rate Variability (HRV) Biofeedback

SDNN
Normal range: 50-100 ms

اختلال / مشکل	سطح اثربخشی	ماژول مورد استفاده
سوء مصرف مواد / الکل	سطح ۳	نوروفیدبک
اضطراب	سطح ۴	نوروفیدبک / HRV/EMG
بیش‌فعالی / نقص توجه	سطح ۵	نوروفیدبک
اتیسم	سطح ۳	نوروفیدبک
افسردگی (غیر از MD)	سطح ۴	نوروفیدبک / HRV
صرع	سطح ۴	نوروفیدبک
فیبروما یا لژیا	سطح ۳	نوروفیدبک / EMG
اختلال خواب (Insomnia)	سطح ۳	نوروفیدبک
بیماری مزمن انسداد ریوی (COPD)	سطح ۲	HRV
تینیتوس	سطح ۳	EMG/SC
آسیب‌های مغزی (TBI)	سطح ۲	نوروفیدبک
بهبود کارکردهای شناختی	سطح ۳	نوروفیدبک / سایر ماژولهای بیوفیدبک
ناتوانی یادگیری	سطح ۳	نوروفیدبک
سردرد (تنشی / میگرن)	سطح ۴	نوروفیدبک / Temp/EMG
آرتروز	سطح ۳	EMG
آسم	سطح ۳	HRV/Resp
فلج مغزی (بهبود مولفه های حرکتی)	سطح ۲	EMG
یبوست	سطح ۴	EMG/Pelvic Floor
بیماری عروق کرونر	سطح ۲	HRV
اختلال استرس پس از سانحه (PTSD)	سطح ۳	نوروفیدبک / HRV
فشار خون	سطح ۴	EMG/HRV
فشار خون حاملگی	سطح ۴	SC/HRV

EMG/Pelvic Floor	سطح ۴	بی اختیاری مدفوع	
EMG/Pelvic Floor	سطح ۳	بی اختیار ادرار (کودکان، مردان، زنان)	
HRV	سطح ۴	سندروم روده تحریک پذیر (IBS)	
Temp/EMG	سطح ۴	رینود	
Temp	سطح ۲	تعریق زیاد	
EMG	سطح ۲	سکته (بهبود عملکرد حرکتی)	
EMG	سطح ۳	فلج صورت	
HRV/SC	سطح ۳	بیماری حرکت (motion sickness)	
EMG	سطح ۴	دردهای سینه بدون منشأ قلبی	درد مزمن
EMG	سطح ۴	دردهای عضلانی صورت	
EMG	سطح ۳	درد عضو خیالی (Phantom Pain)	
EMG/Pelvic Floor	سطح ۳	ضعف عضلات لگن	
EMG	سطح ۲	سندروم تونل کارپل	
EMG	سطح ۲	سندروم پیش از قاعدگی (PMS)	
EMG	سطح ۲	درد اسپاسم عضلانی	
EMG Biofeedback Assisted Relaxation	سطح ۴	دیابت (کنترل گلیسمی)	

Other Applications

Biofeedback and Brain performance- (Heart and Brain)

heart actually sends more signals to the brain than the brain sends to the heart!
Moreover, these heart signals have a significant effect on brain function – influencing emotional processing as well as higher cognitive faculties such as attention, perception, memory, and problem-solving.

TABLE 1 | Participants' characteristics, cognitive domains analyzed, HRV measurements, and links to cognitive performances in the selected studies.

Study	Participants				Cognitive Domain								Domain HRV	Relation between HRV and cognitive performances
	Group	N	Age M (SD) ^a	Sex (% men) ^a	GC	ME	EF	LG	AT	PS	VS			
Melis and Van Boxtel, 2001		52	22.0 (3.0)	48	✓								HF; MF*	Positive
Hansen et al., 2003		53	23.0				✓		✓				HF	Positive
Hansen et al., 2004		37	19.1				✓		✓				HF	Positive
Kim et al., 2006		311	65–85	0	✓								RMSSD; HF	Positive
Britton et al., 2008		5375	58.0 (6.0)	72	x	x	x	x	✓				SDNN; LF; HF.	No Relation
Duschek et al., 2009		60	24.5 (3.7)	47									MF*	Positive
Drucaroff et al., 2011		18	47.7 (15.7)	27.8					✓				SDNN; LF; HF	Positive
Shah et al., 2011		416	55.0 (2.9)		✓								HF	Positive
Solernó et al., 2012		19	21.5 (0.5)	47	✓						✓		RMSSD; SDNN; HF.	Positive
Frewen et al., 2013	Male	2145	61.8 (8.3)	100.0	✓	✓	x	✓	x		✓		SDNN; LF; LF/HF	Positive
	Female	2618	61.5 (8.39)											
Kimhy et al., 2013		817	57.11 (11.15)	44.2					✓				HF	Positive
Gillie et al., 2014		75	18.4	36.4			✓ ^b						HF; LF	Positive
Zeki Al Hazzouri et al., 2014		869	76.0 (6.0)	41	✓				✓				SDNN; RMSSD	Positive
Mann et al., 2015		533	54.9 (10.7)	46.3					✓				HF	Positive
Williams et al., 2016		104	19.25 (1.43)	54						✓			HF	Positive
Mahinrad et al., 2016		3583	75.0 (3.0)	47	✓	x	✓				✓		HF	Positive
Colzato and Steenbergen, 2017	High HRV	44	21.3 (0.3)	43.2									HF	Positive
	Low HRV	44	21.1 (0.3)	43.2										
Zeki Al Hazzouri et al., 2017		2118	45.0 (4.0)	42		x	✓						SDNN; RMSSD	Positive
Colzato et al., 2018		90	22.1 (2.5)	33.3			✓						RMSSD; HF	Positive
Ottaviani et al., 2018		50	24.2 (4.0)	38			✓						RMSSD; HF	Positive

M, mean; SD, standard deviation; domain assessed but not resulted impairment in this study; domain assessed and resulted impairment; GC, general cognitive; ME, memory; EF, executive functioning; PS, information processing speed; VS, visuospatial skills; HF, high-frequency band; RMSSD, root mean square; LF, low-frequency band; LF/HF, ratio of LF-to-HF power; ^anot reported in all studies; ^bability to suppress unwanted memory; *MF, memory.

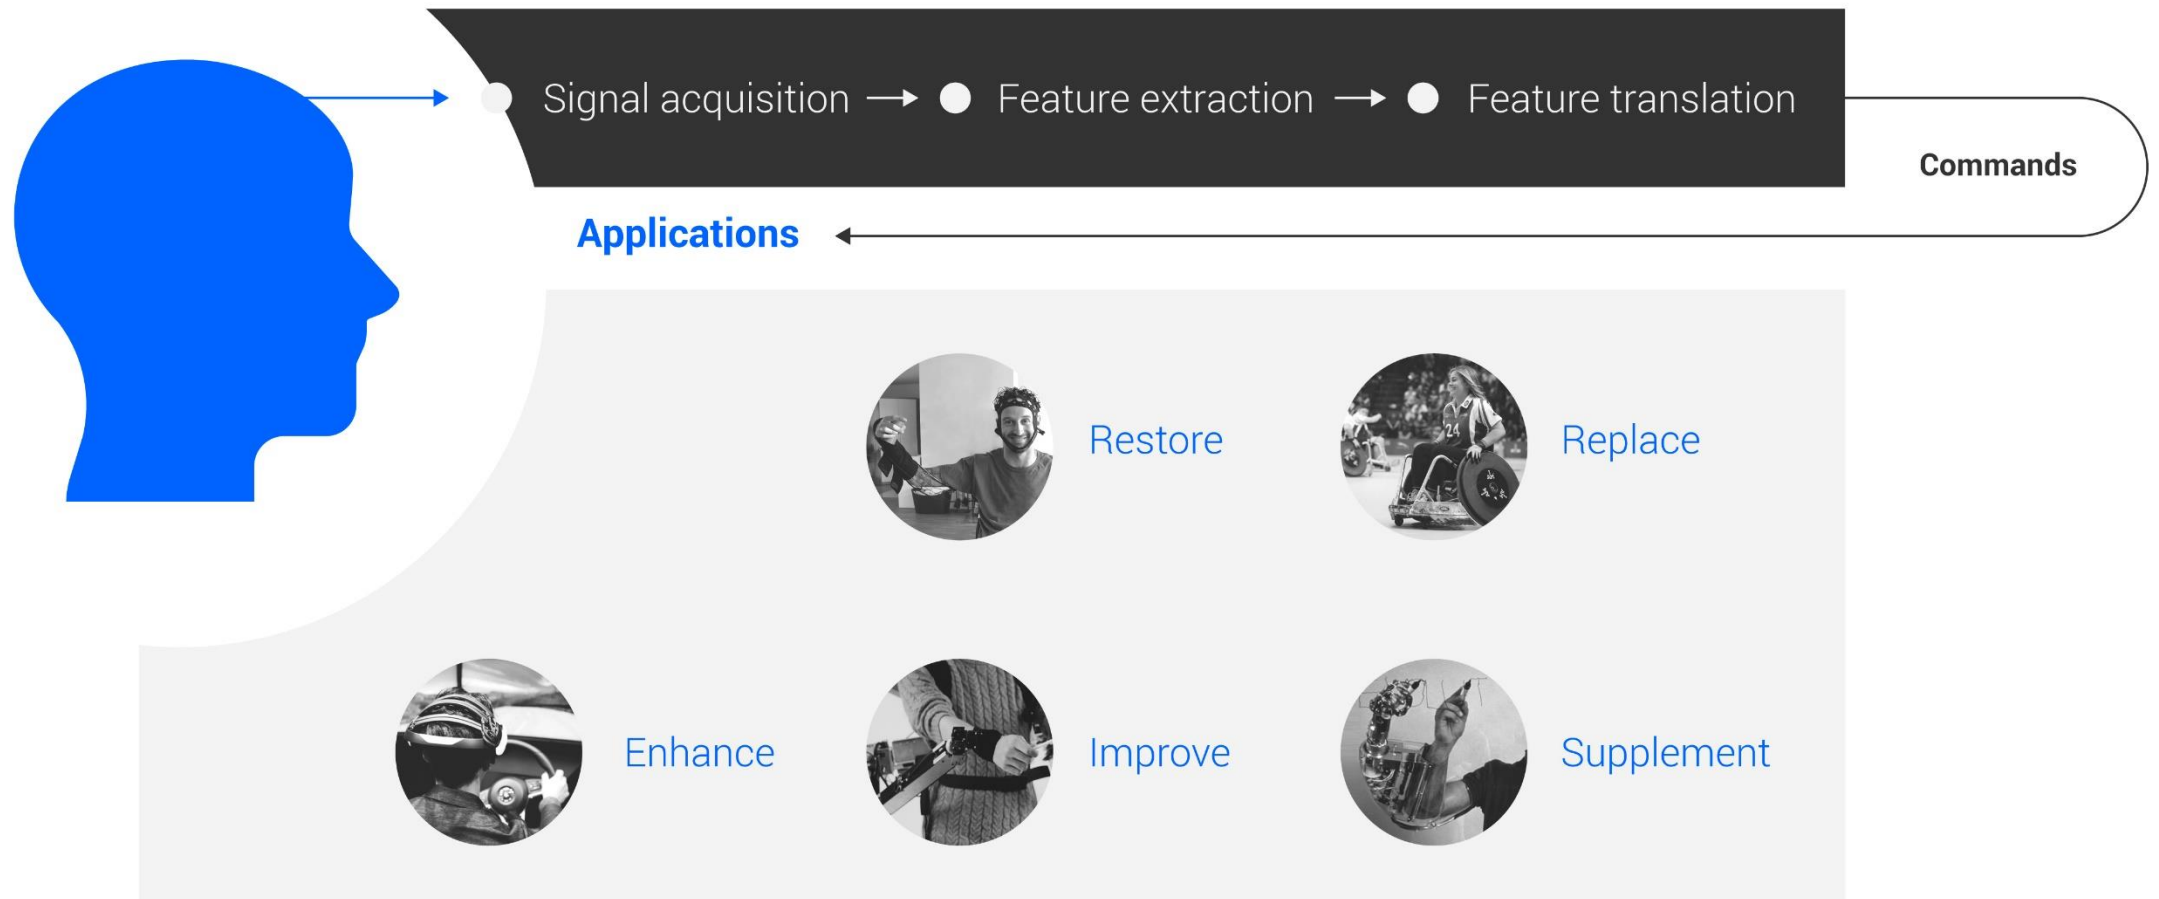

Biofeedback + VR

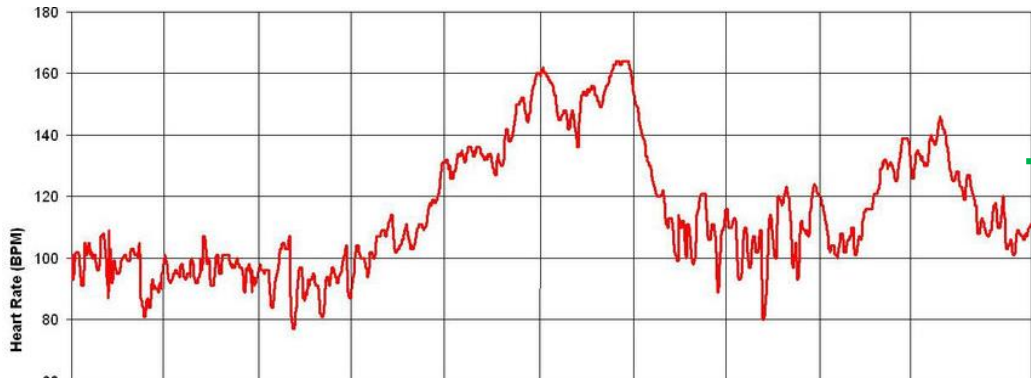

Biofeedback & BCI/HCI

Brain-computer interface

Predictor of BCI success

Electrophysiological Signals as Biomarker

- 1. Quantitative Analysis of Surface Electromyography: Biomarkers for Convulsive Seizures**
- 2. Electromyography Signals as Biomarkers for Parkinson's Disease**
- 3. Wrist-Worn Electrodermal Activity as a Novel Neurophysiological Biomarker of Autonomic Symptoms in Spatial Disorientation**
- 4. The association between electrodermal activity (EDA), depression and suicidal behaviour: A systematic review and narrative synthesis**
- 5. Heart Rate Variability as a Biomarker for Predicting Stroke, Post-stroke Complications and Functionality**
- 6. Short-Term Heart Rate Variability and Blood Biomarkers of Gastric Cancer Prognosis**
- 7. Heart Rate Variability as Early Biomarker for the Evaluation of Diabetes Mellitus Progress**
